### **DETAILED ACTION**

#### ***Allowable Subject Matter***

1. Claims 1, 3-5, 9-18, 20-22, 26-27, 30-61 allowed.

#### ***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance:
3. The closest prior art that the Examiner has been able to locate is Checchio (US PAT 6,052,675 and D'Agostino (US PAT 6,324,526).
4. Checchio discloses authenticating the user at the server via an authentication signal of a device of the user (see FIG. 1A, step S1) while the user is at an online or offline site of a merchant (see column 2 lines 6-14); transmitting via the user device directly to a financial institution an activation signal for activating a reusable, pre-existing, unaltered and permanent credit or debit card account number of the user from the user device to the financial institution for processing financial transactions, while the user is authenticated and based on the specification of the merchant (see FIG. 1A, step S9, see claim 22 for "directly"); submitting a payment request including the credit or debit card account number to the financial institution from the merchant, while the credit or debit card account number is activated (see FIG. 1B, step S15); and deactivating the reusable, pre-existing, unaltered and permanent credit or debit card account number after the payment request is processed by the financial institution, wherein the financial institution only accepts and processes payment requests received from the merchants

while the credit or debit card account number is activated, and the financial institution declines payment requests while the credit or debit card account number is deactivated.

5. D'Agostino teaches a method for pre-authorizing repeating transactions which includes pre-authorizing transactions wherein payments may be automatically accessed by a merchant over a predetermined or unspecified time interval (such as every thirty days) for a specific amount of a maximum dollar amount limit, wherein further authentication is not required (see column 3 lines 55-65, column 8 lines 29-46).

6. While Checchio and D'Agostino are similar to the instant application in many ways, there are clear patentable distinctions. Checchio and D'Agostino, alone or in combination, do not teach or fairly suggest: receiving a merchant identification signal; while the user is at an online merchant, logging in the user by the server via a login signal sent to the online merchant selected based on the merchant identification signal; transmitting an activation signal for the credit or debit card account number; and de-activating the credit or debit card account number by the user device via a de-activation signal sent by the user device to the financial institution.

7. The following is a formal statement of reasons for allowance:

8. Claims 1 and 26 are allowed because the best prior art of record, Checchio and D'Agostino, alone or in combination, neither discloses nor fairly suggests the limitations, in a method and computer program product, for managing a financial transaction of a user at both online and offline merchants, comprising:

providing via a server a merchant identification signal including an identification of both online and offline merchants for selection by a user;

authenticating the user at the server via an authentication signal of a device of the user while the user is at an online or offline site of a merchant selected based on the merchant identification signal, and for an online merchant logging in the user by the server via a login signal sent to the online merchant selected based on the merchant identification signal;

transmitting via the user device directly to a financial institution an activation signal for activating a reusable, pre-existing, unaltered and permanent credit or debit card account number of the user from the user device to the financial institution for processing financial transactions, while the user is authenticated and based on the selection of the merchant by the user based on the merchant identification signal from the server;

submitting a payment request including the reusable, pre-existing, unaltered and permanent credit or debit card account number to the financial institution from the merchant, while the reusable, pre-existing, unaltered and permanent credit or debit card account number is activated; and

de-activating by the user device via a de-activation signal sent by the user device to the financial institution the reusable, pre-existing, unaltered and permanent credit or debit card account number after the payment request is processed and accepted by the financial institution, wherein the financial institution only accepts and processes payment requests received from merchants while the reusable, pre-existing, unaltered and permanent credit or debit card account number is activated, and the financial institution declines payment requests while the reusable, pre-existing, unaltered and permanent credit or debit card account number is de-activated,

wherein when the payment request comprises a recurring payment request or a partial payment request and the method further comprises processing the partial payment request

including generating one or more subsequent activation signals by the server and generating deactivation information based on the selection of the merchant by the user for processing remaining payments or processing the recurring payment request including generating one or more subsequent activation signals by the server and generating deactivation information based on the selection of the merchant by the user for processing recurring payments, and

the generation of the subsequent activation signals by the server do not require further authenticating of the user by the server.

9. Claims 3-5, 9-18, 20-22, 27, and 30-61 are also allowed at least by virtue of their dependence on one of allowed independent claims 1 and 26.

10. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
